

Donate Life Patch Program Quick Start Guide

*The Donate Life Patch Program Quick Start Guide was developed by the Donate Life Youth Education Committee. This document is to serve as a template for your local outreach. It should **only** be used and distributed by Donate Life State Teams or local Donate Life affiliated organizations when pursuing local partnerships with Girl Scout councils or troops. This does not represent an official partnership between Donate Life America and Girl Scouts of the United States of America.*

*Donate Life patches (pictured above) are available for bulk order by Donate Life State Teams or local Donate Life affiliated organizations through Boost Promotional Branding at **Members.DonationMerchandise.com**. Please contact Robb Anderson for questions regarding the patch: **robb@boostbranding.com**, 804-560-7000 x104.*

Thank you from the Donate Life Community

Thank you for pursuing organ, eye and tissue donation education with your Girl Scout Troop. Girl Scouts across the country show a commitment to make the world a better place every day. Learning about and promoting donation education is just another way for Girl Scouts to do what they do best... change the world. This guide has the facts and information about organ, eye and tissue donation that you and your girls will need to pursue organ, eye and tissue donation advocacy.

On behalf of the more than 100,000 people awaiting a lifesaving organ transplant and the hundreds of thousands in need of corneal and tissue transplants, THANK YOU.

In this guide, you will find:

- Recommended patch program activities
- Organ, eye and tissue donation overview and how the process works
- How to talk about donation, creative ideas, links and a coloring book

DONATE LIFE PATCH PROGRAM

OUTCOMES

Organ, eye and tissue donors save and heal lives. We each have the power and responsibility to help others. Many people are in need of lifesaving and healing transplants. By telling more people about donation and asking people to register their decision, we can take small steps towards the goal of saving and healing more lives. By participating in the Donate Life Patch Program, girls will benefit from learning:

- Positive Values
- Challenge Seeking
- Community Problem Solving

Select the activity(ies) below that are best suited for your troop. Each organization and Girl Scout Council may decide on their own if a certain number or activities is required to earn the patch. In the following pages you will find more information and resources for your use during activities.

TROOP ACTIVITY IDEAS BY AGE

Daisies

- With the help of an adult, use a dictionary, encyclopedia, or the internet to learn what an organ is. Once each girl finds out, have them write it down on a poster, note card, or piece of paper and then share it with the troop. See what is similar and different about each girl's answer!
- Look up each organ available for transplant and write down what they do. Lungs, heart, liver, and kidneys are a great place to start.
- Make a simple craft with blue and green colored materials (Donate Life colors) and have your troop leader talk about the symbolism. Ideas include: bracelets with beads, pom-pom art, mosaics, etc.
- Have each girl trace her handprint on blue or green paper, and make a heart shape with all the troop members' handprints.
- Read the book *Donorsaurus* (see DLA member site for this resource) and consider having the girls color a page.

Brownies

- With the help of an adult, use a dictionary, encyclopedia, or the internet to learn what an organ is. Once each girl finds out, have them write it down on a poster, note card, or piece of paper and then share it with the troop. See what is similar and different about each girl's answer!
- Look up each organ available for transplant and write down what they do. Lungs, heart, liver, and kidneys are a great place to start. With more advanced Brownies, you can look into the small intestine, pancreas, and tissue like corneas or skin. When doing this activity, you could divide the troop into buddy pairs and each pair look up one organ. Once everyone knows what their organ does, they can draw or write about their organ and later have each pair share what they learned.
- Using large poster paper, draw or trace a body outline. Separately, make paper cutouts of the different organs and tissue for transplant. You will use this as a game board where girls will take the organs and put them on the body where they belong. This can be a team, pair, or individual activity as a relay or timed game.

- Make crafts with blue and green materials, and have the leader talk about the symbolism. See the Daisy section for ideas!
- Make a list of ways that you can help someone after they have had an organ transplant or other big surgery.
- Make a poster board with blue and green materials, and have leaders explain a few facts about donation to the troop (see resource section). Have girls pick the facts they find most important to put on the poster.
- Draw a picture with something that symbolizes what it means to Donate Life (you can suggest the girls use hearts, blue and green colors).
- Have the girls dance to a song that is inspiring and discuss how organ, eye and tissue donors allow others to live longer by giving the gift of life.
- Give the girls a Donate Life green bracelet to wear for an entire day and encourage them to tell others what it means.

Juniors **Cadettes** **Seniors** **Ambassadors**

- Research five facts about organ donation and share them with your troop or family members.
- Learn the real-life story of a transplant recipient. Pick a story on Donate Life America's website (<https://www.donatelife.net>). Stories can be found on the Stories of Hope page and video stories can be found on the Things You Can Do page, both are in the How You Can Help section.
- Write a short story or poem about someone who receives an organ, eye, or tissue donation.
- Research as a troop, partners, or individually how people on the organ transplant waiting list get matched with potential donors. What are three things doctors look for in a good match?
- Research three common myths about organ donation. Write them down, and then share why these myths are untrue with your troop or family members.
- Wear blue and green on your meeting day in honor of those on the national transplant waiting list. Encourage girls to go online to find out the latest number of people waiting for a transplant.
- Take a picture in your Girl Scout uniform with blue and green accessories to post and share inspiring messages about organ donation. Consider posting it on your troop or council's social media page.
- Make a keychain from beads or hearts, and have each girl tell a "key fact" about saving lives through organ donation.
- Make hearts from clay or paint pottery with hearts.
- Play a game with myths/misconceptions. One girl reads the myth and another girl can tell the fact. You can cut these from the list of FAQs and highlight the part you want each girl to read (see resource section).
- Create a poster or bulletin board with an inspiring message about donation. Team up with a local business, community center or library to display your poster or bulletin board.
- Contact a local transplant center to see if they have specific things the girls can collect (pediatric transplant may request crayons and coloring books). Check to see if you can arrange a tour!
- Ask a Donate Life partner to come talk about organ, eye and tissue donation at a troop meeting. Invite your parents to come and listen!
- Find someone in your community that has been impacted by donation and ask them to share their story at a troop meeting. Invite your parents to come and listen! (Give a 5-10 minute time limit to allow time for Q&A.)
- Walk 8 laps around the track to symbolize the 8 lives that can be saved by donation.
- Ask your school if you can pass out heart-shaped lollipops on National Donor Day (Valentines Day). Make slips of paper for the lollipops explaining the importance of donation.
- Set up a table to give out information about organ, eye and tissue donation in places like libraries, churches, or even at parent pick up after a troop meeting (see resource section).

- Encourage your troop to dress in blue and green in April to celebrate Blue and Green Day. (This day changes every year. Check DonateLife.net/blue-green-day/ to find out when it's taking place in April!)
- Give out doughnuts for donors or just discuss donation at a public place like a library, sporting event, or after a church service.
- Lattes for Life is a great way to discuss donation while sharing iced coffee (pre-mixed in acrylic dispensers) with your friends or community.
- Host an activity during a sporting event at your school (center court shoot out, colored pom-poms or ribbons for cheerleaders, Donate Life stickers on players' helmets). Ask the announcer to bring attention to the gesture and why organ, tissue and eye donation is important.
- Host blindfolded kickball event to bring attention about the importance of giving the gift of sight.

Seniors

Ambassadors

- Careers in the organ and tissue donation field are one of the most challenging, rewarding, and rapidly changing areas of medicine. Research the careers below and provide a brief description for each. As a troop, discuss what each girl finds most interesting and why.
 - Careers you can research include: Transplant Surgeon, Pharmacologist, Lab Technician, Nutritionist, Immunologist, Child Life Specialist, Social Worker
- National Donate Life Month is celebrated every year in April. Create posters, flyers, or other resources that promote organ donation and share them in your community during this month.

ABOUT ORGAN, EYE AND TISSUE DONATION

WHAT IS ORGAN, EYE AND TISSUE DONATION?

When you sign up to be an organ, eye and tissue donor on the National Donate Life Registry – [RegisterMe.org](https://www.registerme.org) – or with a state registry, you are registering your decision to become a donor upon your death. This document of gift provides legal authorization to have your organs, corneas and/or tissue made available for those in need of lifesaving and healing transplants.

Donors are often people who died suddenly and unexpectedly. Their families are then faced with making the decision at a time of shock and grief. Registering now relieves your family of this burden and serves as a real gift to them, as well as to the grateful recipients of your donation.

THE NEED IS GREAT

More than **100,000** men, women and children await lifesaving organ transplants

Even the largest football stadium in the US could not fit the number of patients on the national transplant waiting list

Another person is added to the waiting list every 10 minutes

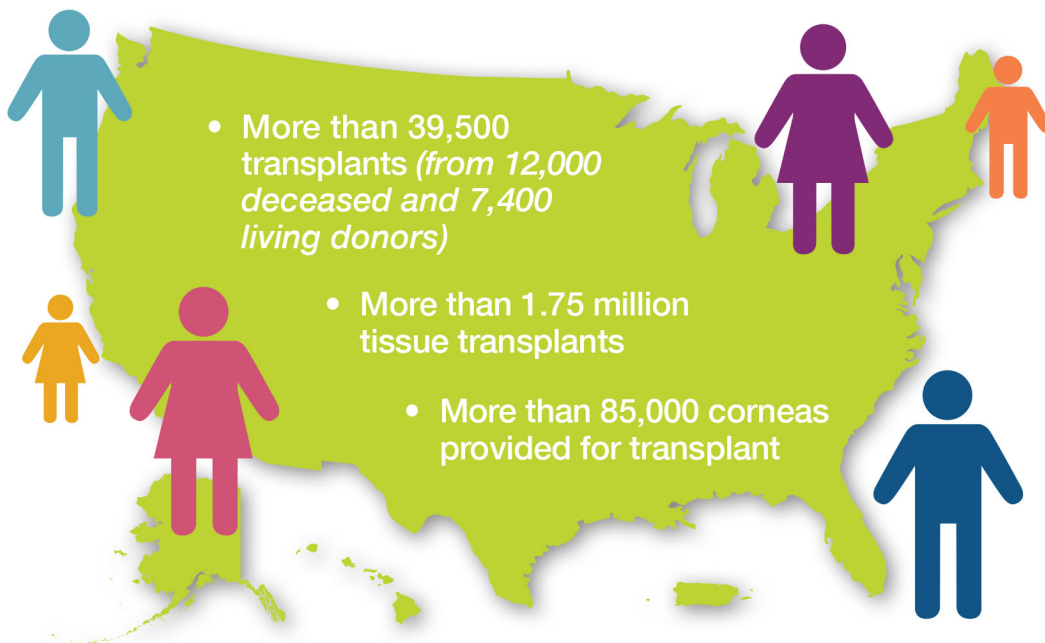

8,000 people die each year because the organs they need are not donated in time

84% of patients waiting are in need of a kidney*

11% of patients waiting are in need of a liver*

**A living donor is an option for these patients.*

LIVES SAVED AND HEALED EACH YEAR

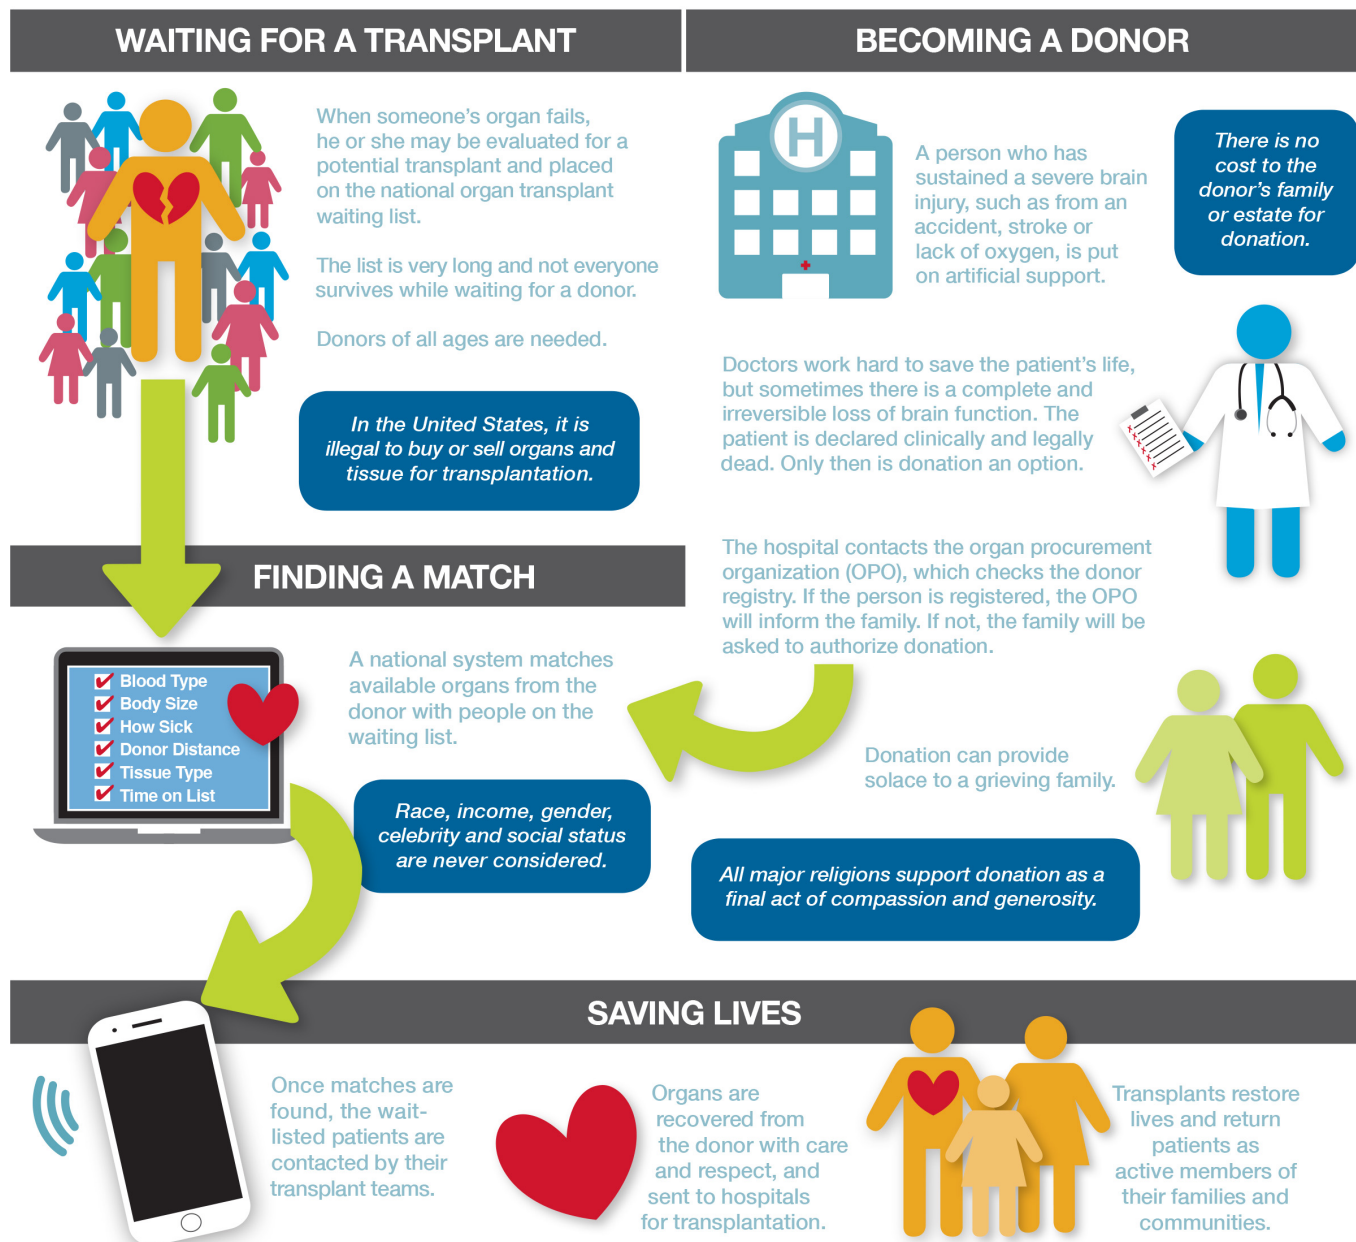

**As of Summer 2020. For updated statistics, visit [UNOS.org](https://unos.org).*

ABOUT ORGAN, EYE AND TISSUE DONATION

HOW DOES THE PROCESS WORK?

There are specific circumstances that must occur for someone to become an organ donor after they die. Although cases vary, there are general steps that lead to donation.

WHY BLUE & GREEN?

The colors blue and green were chosen as life-affirming colors to represent the Donate Life brand back in 2000 when the logo was created. Both colors are tranquil and calming. Together, the blue and green colors signify the balance of sky and earth, both holding life.

It can sometimes seem intimidating to ask people to register as donors. The truth is, most people support donation and just have not thought about registering, or have not been given the opportunity. Use these tips for ideas on how to start the conversation, overcome misconceptions, and answer common questions.

STARTING THE CONVERSATION

Whether you are holding a registration table at a football game, community event or just on campus one day, it is important to engage your audience. This means standing in front of the table to draw people in, rather than waiting for them to come to you.

Open with an interesting fact.

- “Hey, did you know that you can save eight lives by registering as a donor?”

Use giveaways to engage people as they walk by, whether it is a bracelet, pair of sunglasses or food.

- “Do you want a free donut? We’re giving them away to everyone who stops by to learn more or registers to be an organ donor!”

Just ask!

- “We’re registering people as organ donors today! Have you registered yet? It only takes a minute.”

OVERCOMING MISCONCEPTIONS

“Doctors won’t save my life if they know I am an organ donor.”

- In an emergency, it is the entire medical team’s first priority to save the life of their patient, and they will not check to see if you are an organ donor. Doctors work hard to save the patient’s life, but sometimes there is a complete and irreversible loss of brain function. The patient is declared clinically and legally dead. Only then is donation an option.

“You don’t want my organs!”

- Even if you drink or smoke, you could still be a donor! Let the doctors decide when the time comes. A medical evaluation is done by donation professionals at the time of death to determine eligibility.

“I have a medical condition, so I can’t.”

- Anyone can register regardless of his or her medical history. A medical evaluation is done by donation professionals at the time of death to determine eligibility. If it is something you believe in, let the doctors make that decision when the time comes!

“I’m too old to donate.”

- Anyone can be a potential donor, regardless of age. One out of three donors is over the age of 50! A medical evaluation is done by donation professionals at the time of death to determine eligibility.

“I think I’m already registered.”

- Awesome! If you’re not sure, you can always register again in the National Donate Life Registry! The national and state registries are separate registries, but both are checked at the time of a person’s death.

“It’s against my religion.”

- All major religions support organ, eye and tissue donation as one of the highest expressions of compassion and generosity.

“I have to check with my parents.” or “My parents don’t want me to.”

- Donation is a personal choice, but it is important to discuss it with your family and loved ones. Make sure that they know your wishes!

FREQUENTLY ASKED QUESTIONS

Will I be able to have an open casket funeral if I donate?

- An open casket funeral is possible for organ, eye and tissue donors. Donation will not impact any other funeral arrangements either.

Who will receive my donated organs and tissues?

- Many factors go into the matching process, including medical urgency, blood type and geographical location of the donor and recipient, among other criteria.
- Due to medical privacy laws, the identities of organ donors and recipients must be kept anonymous unless both parties agree to share that information.

Does my social and/or financial status play any part in whether or not I will receive an organ if I ever need one?

- No. A national system matches available organs from the donor with people on the waiting list based on blood type, body size, how sick they are, donor distance, tissue type and time on the list.
- Race, income, gender, celebrity and social status are never considered.

Can I decide which organs and tissues I want donated?

- After registering as a donor on RegisterMe.org, you can login online to specify your donation preferences.

Why register my decision to be an organ, eye and tissue donor?

- You can save up to 8 lives and heal the lives of more than 75 people.
- Donation gives comfort to the donor family in knowing that their loved one helped to save the lives of others.
- Registering your decision and sharing it with your family lets them know your wishes.

Where can I register as an organ, eye and tissue donor?

- Online right now! Sign up with the National Donate Life Registry at RegisterMe.org.
- In the Medical ID tab of the iPhone Health app.
- At the DMV when applying for or renewing a license or ID card.
- It is important to tell your family members that you have decided to register your decision to be a donor so that they will know your wishes.

PARTNER

Co-host your event with another club to help make it a success! Examples include fraternities, sororities, multicultural clubs, PRSSA – Public Relations Student Society of America, pre-med, nursing, and athletic programs.

CONNECT TO THE COMMUNITY

Reach out to and invite community leaders – the mayor or a state representative – to participate. Your Donate Life representative may also have connections with a local transplant hospital or organ procurement organization for additional support.

SHARE A STORY

Find a student, faculty member or a local family that has a connection to transplantation. A “local” story is powerful! This could include someone waiting to receive a transplant or a donor family that is interested in sharing their story. Again, your Donate Life representative may be able to connect you with a local speaker or story.

FUN WITH FOOD

Have treats to give out as a “thank you” to those that register, reaffirm their decision, or stop to find out more about being an organ, eye and tissue donor. Reach out to the local coffee shops, bakeries and grocery stores for food item donations.

- *Lattes for Life* – Partner with your campus coffee shop to give free coffee or a discount.
- *Donuts for Donors* or “*Donut You Want to Be a Donor?*” – Give out donuts.

USE THE STATS

Numbers are powerful. Try integrating some of the donation statistics into your event.

- Sound a bell or horn every 10 minutes to represent a person being added to the national organ waiting list
- To illustrate the 22 people who die each day waiting for a transplant, advertise your event by posting flyers featuring headshots of 22 students.
- Have 22 people wear t-shirts with a number on it signifying 22 people die each day.

GET CREATIVE!

Do something unique at your school. Create competitions between schools, have a challenge between rival schools to sign up the most students to the registry and award with a trophy! Use your local Donate Life representatives for ideas and resources.
